

Hansatorf

Recipe: 70020

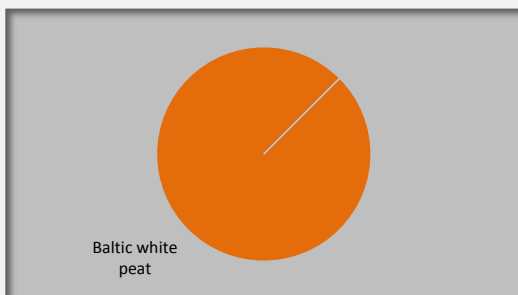

Field of application:

Baltic white peat without lime and fertilizer, for own mixing of growing media and for soil improvement.

- ☐ Trays ☐ General propagation, soil blocks ☐ Growbag ☐ Tubs ☐ Hanging baskets ☐ Planting soil ☐ Lawn
☐ Potting, pot size: ☐ 7-9 cm ☐ 8-11 cm ☐ 8-14 cm ☐ >12 cm ☐ Cont. >1 l ☐ Cont. >3 l ☐ customized

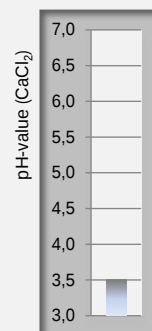

Technical data:

Composition

Chemical characteristics (at the moment of production)

pH value * (CaCl ₂)	3,5
Salt content * (g/l)	< 0,2
N-nitrogen * (CaCl ₂)	< 50 mg/l
P ₂ O ₅ -phosphate * (CAL)	< 50 mg/l
K ₂ O-potassium * (CAL)	< 50 mg/l
Structure	not defined

Pure peat without lime and fertilizer.

- ☐ contains wetting agent ☐ contains clay ☐ contains sand ☐ contains slow release fertilizer

* Deviation according to the quality parameters established by the Gütegemeinschaft Substrate für Pflanzenbau e.V. (German Quality Assurance Association Growing Media for plants)

Constituents and additives

Slightly decomposed raised-bog peat (white peat)

Effect on the substrate

increases the air capacity and improves the structural stability

Advice:

Hansatorf is milled peat. For this reason pieces of peat of different sizes and small pieces of wood can appear in the Hansatorf. If you need a homogeneous structure for special demands we recommend Florabalt products which are sieved peat products. The product should be stored in a dry and cool place and protected against direct sunlight. Our advice would be to use up the product as soon as possible. When stored for a longer period of time, the product should be analyzed before it is used. If questions occur, please get in touch with your contact person or the technical department of horticulture at Floragard (Tel. +49 441 2092-0).
